- ▶ The government continued to work on reducing the public debt, paying off arrears, and producing and publishing annual reports on debt statistics.
- ▶ The government continued to increase spending on the social sector, including on education, health, and social protection.
- ▶ There is a need to address the challenges in education, particularly low completion rates and limited access to quality education for rural and female students.
- ▶ Addressing high maternal mortality and fertility rates and increasing public spending on education and health are crucial needs that require the government's attention.
